Wireless modules and boxed solutions

Specialise in solutions based on the Wireless M-Bus, Wifi, Bluetooth and ZigBee standards, international and ISM frequency bands (169 – 433 – 458 – 868 – 915MHz – 2.45GHz), 1mW to 4Watts power. Transmission modes: mesh, addressed, repeater, transparent. Up to 6km ranges.
www.adeunis-rf.com

PCB Antennas for GPS, GSM, ISM Band, Zigbee, WiFi & Bluetooth

Antenova is a leading developer and supplier of high performing integrated antennas and RF solutions for wireless communication and consumer electronic devices.
www.antenova.com

APS Advanced Printing Systems

APS specialises in design and manufacturing of OEM thermal printer mechanisms, controller boards and custom thermal printing solutions.
www.aps-printers.com

Wireless energy harvesting radio sensors

EnOcean is the originator of patented energy harvesting wireless sensor and switch technology for use in building and industrial installations. Their energy efficient radio protocol is driven by the EnOcean Alliance. Three types of ambient harvesting are used namely Motion, Solar sensor module and Thermo Energy Harvesting. Realizing the impressive catchphrase: "Wireless Battery/less Limitless!"
www.EnOcean.com

M2M Device Drop In Networking For GSM, Zigbee, WiFi & Serial

Digi is the leader in commercial grade device networking and is an innovator of wireless machine-to-machine (M2M) device networking products. Non-embedded products include cellular routers, gateways, wireless communication adapters (ZigBee, WiFi, proprietary RF), serial servers, intelligent console servers, USB connected products, remote display products, cameras and sensors.

Experts in sensors

Farsens has been working with multinational companies in this area since its inception. Experience, combined with research, has led us to design and manufacture breakthrough wireless battery free sensors that are able to help most innovative companies improve their businesses.
www.farsens.com

RFID Products & POS Peripherals

GIGA-TMS produces RFID products, POS peripherals, mobile data-collection terminals, access-control systems and more.
www.gigatms.com.tw

An award-winning captive portal, cloud-RADIUS / AAA wireless platform

We deliver high-performance Wi-Fi software, service and analytics for the world's leading service providers and their customers, across education, retail, hospitality, sports venues, travel & transport, enterprises and consumer networks. Our platform supports billions of authentications and concurrent users, using hundreds of devices and networks.
www.globalreachtech.com

Auto ID & Touch Memory

The iButton is a computer chip enclosed in a stainless steel container which is unique and durable. Small and portable enough to attach to a key fob, ring, watch, or other personal items, and can be used daily for applications such as access control to buildings and computers, asset management, and various data logging tasks.

Radar sensor and -system for high quality requirements

InnoSenT developed, produced and marketed radar sensors for our national and international B2B customers since 1999. InnoSenT is the qualified and innovative contact partner in the sector and belongs to the market leaders in the automotive and industrial sectors worldwide.
www.innosent.de/en

new

Data communication systems for a wide range of applications

Our solutions can be found from automation on factory floors to the control of natural resources on waterways, in use for various reasons, be it remote control or maintenance, alarm signaling or the recording of measurement readings.
www.insys-icom.com/icom/en

Global market leader in detection and analysis solutions

We provide machine vision, RFID, barcode scanning, printing, and color and light measurement products and services for original equipment manufacturers (OEMs). We design and manufacture embedded detection and analysis solutions to help solve unique inspection, tracking, scanning, and documenting challenges in the healthcare market. Since 2000, JADAK has been a tier one supplier to healthcare market with a majority of business coming from medical device manufacturers.

LINE CARD

Lantech™
Powering Industrial and IP Networks

Industrial & IP Device Networks

Lantech is continuously developing cutting edge technologies. Their innovative solutions include applying ITU G. 8032 ring protocol to networking field with its recovery time in 20ms up to 256 nodes. Lantech products are suitable for vertical markets containing Factory Automation, ITS (*Intelligent Transportation System*), EN50155 for high-speed rail way, IEC-61850-3 for substation, DNV for ships, and UL Class I Division II for Oil & Gas, etc.
www.lantechcom.com

LANTRONIX™

M2M Device Networking, Ethernet, WiFi & Serial

Lantronix is the industry leader in secure communications solutions to connect and control any type of equipment via the Internet. Products include: Device Networking, Embedded and Boxed. Remote Device Access & IT Management.
www.lantronix.com

LM TECHNOLOGIES
INNOVATIVE TECHNOLOGY PRODUCTS

Bluetooth, WiFi Boxed, Embedded Modules and Dongles

LM Technologies designs, develops and manufactures innovative technology solutions. Products include wireless serial cable replacement with Bluetooth. Bluetooth modules and complete products to easily setup a WiFi Hotspot (AP).
www.lm-technologies.com

maxim
integrated.

Mixed signal, Analog & RF Ics

Maxim Integrated offers highly integrated, analog and mixed-signal semiconductors. Their mission is to deliver innovative analog and mixed-signal engineering solutions that add value to our customers' products.
www.maximintegrated.com

new

neo.cortec

Smallest Modules for Wireless Ad-Hoc Mesh Networking

We offer some of the world's smallest modules for Wireless Ad-Hoc Mesh Networking. The modules come pre-certified to meet CE and FCC requirements. They are easy to integrate into the final application enabling short time-to-market for the final product.
www.neocortec.com

Omni-ID™
Building Intelligent Supply Chains

RFID on-metal tags and solutions

Omni-ID is the leading supplier of high-performance passive RFID tags and visual tagging system solutions. Delivering near-perfect read on, off and near metals and liquids. Enabling complete RFID asset tracking and supply chain management.
www.omni-id.com

OmniVision

Embedded Camera Modules and Sensors

OmniVision Technologies is a leading developer of advanced digital imaging solutions. It's award-winning CMOS imaging technology enables superior image quality in many of today's consumer and commercial applications.
www.ovt.com

RENESAS

Microcontroller, Analog and Power IC's

Renesas Electronics is the world's number one supplier of microcontrollers and a premier supplier of advanced semiconductor solutions including SoC solutions, secure MCU applications and a broad range of analog and power devices.
www.renesas.eu

new

SEGGER
The Embedded Experts

The embedded experts

We are a full-range supplier of hardware and software development tools, as well as middleware for embedded systems – in brief: the embedded experts.
www.segger.com

new

semitech
SEMICONDUCTOR

Semiconductor devices enabling transformation of electricity grids into smart grids

By connecting utilities to their customers, Semitech's chips help to transform homes into energy-aware "smart homes" that react to conditions on the grid, thus implementing a worldwide communications network based on the existing power grid. Dominate the market for power line communications semiconductor products by enabling interoperable, reliable, robust communication in noisy power line environments.
www.semitechsemi.com

SENSOLUTE
SMART SENSOR SOLUTIONS

Micro Motion Sensors

Sensolute is a microelectronics company. They develop and produce ultra low power micro vibration sensors as well as sensor systems with integrated signal evaluation. These small, clever sensors control the operational status of motion-sensitive equipment to extend battery life.
www.sensolute.de/en

new

SILERGY

High performance analog integrated circuits

Founded by a group of technology innovators and business leaders from Silicon Valley, they are widely used in automotive, computer, television, energy metering and other devices. Our products are intended to improve efficiency and to conserve the energy.
www.silergy.com

new

Siretta
Powering Wireless M2M Technology

Leading supplier of wireless M2M products and solutions

Specialising in wireless modems, cloud based software and overall M2M application solutions. To complete the wireless range we have the widest range of antennas, cable assemblies and RF connectors/adaptors.
www.siretta.co.uk

new

Building blocks for embedded applications, to get to market faster with less risk

Our experience covers embedded security, compiler and performance engineering, the development and support of board-support packages for Android, Linux, FreeRTOS and Windows CE, and custom hardware development.

www.theobroma-systems.com

UHF RFID modules and boxed readers

ThingMagic specializes in UHF RFID products that enable computing devices to identify objects in the real world without human involvement. Their product range covers Embedded RFID modules, Integrated Readers and Ruggedized Readers, as well as low power embedded modules for handheld or mobile readers.

www.thingmagic.com

new

GPS Solutions

We are the first company to develop Android in a very cost effective GPS solution. This is most popular portable GPS solution in the world and they dominated the market due to their price strategy and product quality.

www.topicon.hk

GPS & Timing Modules

Trimble is a leading provider of advanced positioning solutions. Best known for GPS technology, it also integrates a wide range of positioning technologies – including laser, optical and inertial technologies with application software. They provide Industrial ruggedized handheld computers, wireless communications, and services to provide complete commercial solutions.

www.trimble.com

Current Transformers (CT)

The VAC product range includes permanent magnets and magnet systems, materials, such as cores and inductive components, i.e. current transformers, sensors, chokes, cores etc.

Leading super capacitors manufacturer company

We contribute to a sustainable society, providing eco-friendly products to fulfill our partners' satisfaction. Established in 1999, has fast become one of the leading energy storage system producers in South Korea.

www.vina.co.kr/eng

Telecommunications equipment and solution provider

We offer a range of devices that deliver wired and wireless managed connectivity services for telecommunications operators and large enterprises. Over the years our technology has evolved from TDM and ISDN systems to various broadband technologies including DSL, GSM/GPRS/3G/4G LTE/CDMA450, Ethernet in the First Mile and VoIP.

www.virtualaccess.com

Europe's leading M2M & IoT managed services provider

We deliver a one-stop solution combining secure infrastructure, resilient software management platforms and multiple network connectivity, all on an unrivaled scale. In partnership with major mobile and satellite operators, we provide best-in-class managed data services to system integrators, application providers and end user clients.

www.wirelesslogic.com

Antennas for GPS, GSM, ISM band, WiFi & Zigbee

2J design and manufacture their own antennas, enabling them to offer high quality yet cost-effective products. 2J offer custom design and excellent technical support services. They are a rapidly expanding company within the telecommunications sector, pushing the boundaries of antennae innovation for the modern wireless world.
