## Unleash the power of the Penguin, with the NEW, 32-bit, Linux-powered XPort® Pro.™

**The all-new XPort Pro – the world’s smallest Linux networking server – allows you to web-enable your non-networked device, equipment or machine quickly and efficiently for the ultimate in remote management.** XPort Pro incorporates today’s most advanced web-server technologies and lets you immediately leverage our powerful Evolution OS™ RTOS or the advanced Linux enabled standards such as IPv6 and UPnP.

With an amazing amount of on-board memory and a 32-bit advanced processor, XPort Pro can easily handle your most demanding applications, while advanced encryption and authentication features provide bullet-proof security. The bottom line is a simpler, more powerful and more secure web-enabled device.

In addition to having the identical form factor as the original XPort, the XPort Pro’s leading-edge architecture, 32-bit processing power and ample memory allow resource-intensive applications to be deployed on a single platform. Advanced networking and security features enable machine-to-machine (M2M) edge computing with unlimited customization and application hosting, providing developers with faster time-to-market and unprecedented application development options.

## The latest Hi-tech mini Portable printer

**MY PRINTER BT the very latest high tech portable mini printer designed by Custom. Ultra light and compact it weighs a mere 205gr.** High printing autonomy thanks to 5 rechargeable batteries. Bluetooth and RS232 interface.

The supported profiles are SPP (Serial Port Profile) that provides RS232 serial cable emulation, and OPP (Object PushProfile) enabling the print-out of vCard format objects (business cards).

Available in shiny white or shiny black with practical belt hook. Battery charger and USB cable included in the pack. MY Printers software is an application that allows to print from BlackBerry® on MY PRINTER through the bluetooth interface simply choosing "print" from the service menu. It's possible to print: SMS, Phone book/addresses, Agenda, Notes, E mail and attachments.
